Nordic Bronze – copper alloy

Nordic Bronze is an alloy of copper and tin with a similar colour to Nordic Standard initially. When exposed to the atmosphere, the surface gradually changes to a stable, dark chocolate brown.

Nordic Bronze is available in sheets or coils.

- ▶ Thickness range: 0.5 – 2.0 mm
- ▶ Maximum width: 780 mm.

It can also be provided in a wide range of different forms and used in various systems.

Nordic Bronze (including first fin in the foreground), in conjunction with Nordic Brass and Nordic Brown™.
